Modu-Rack™

MODULAR PV RACKING SYSTEM

Daetwyler Clean Energy is at the forefront of Solar Mounting Technology. In addition to our suite of racking products, we have a modular system specifically designed for mid-large scale installations > 500kW.

The advantages of Daetwyler's Modu-Rack™ are substantial. With our proprietary modular design, not only do you save on installation & system costs, you also get superior quality! Off-site construction of each system is achievable and gives you better control over quality by allowing you to assemble in ideal conditions before it reaches the job site.

Take a look at what Daetwyler's Modu-Rack™ has to offer. We're certain that it will help you maximize your profits while ensuring years of optimal performance.

Available in Ballast, Non-Ballast and Driven Beam, Daetwyler's Modu-Rack™ can be configured to meet your specific site requirements.

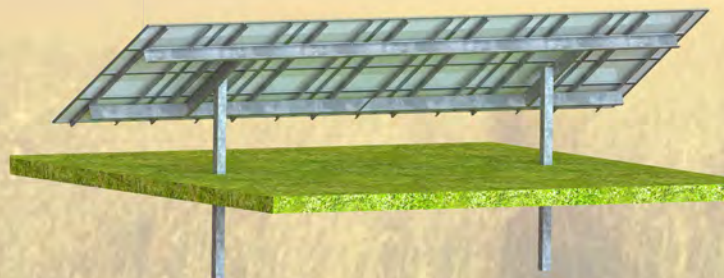

- ✓ Lowest System Cost
- ✓ Most Economical Installation
- ✓ Meets All Topographical Conditions
- ✓ Offsite Preassembly Capable

Ballast

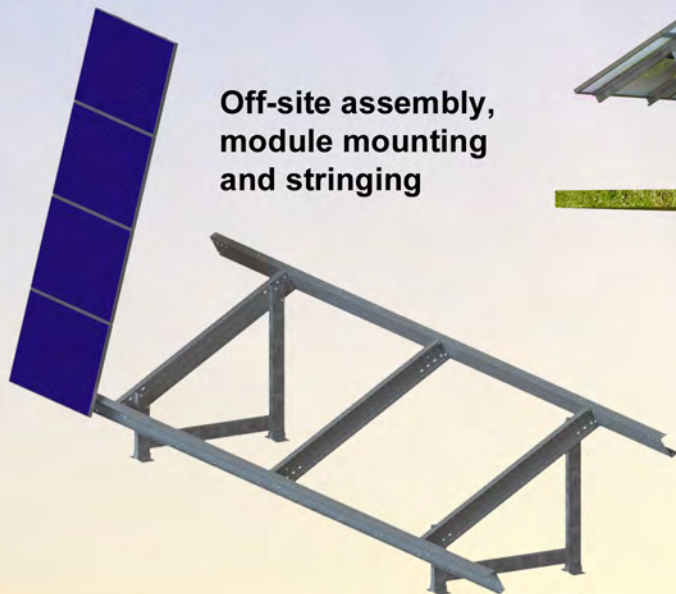

Helical Pier

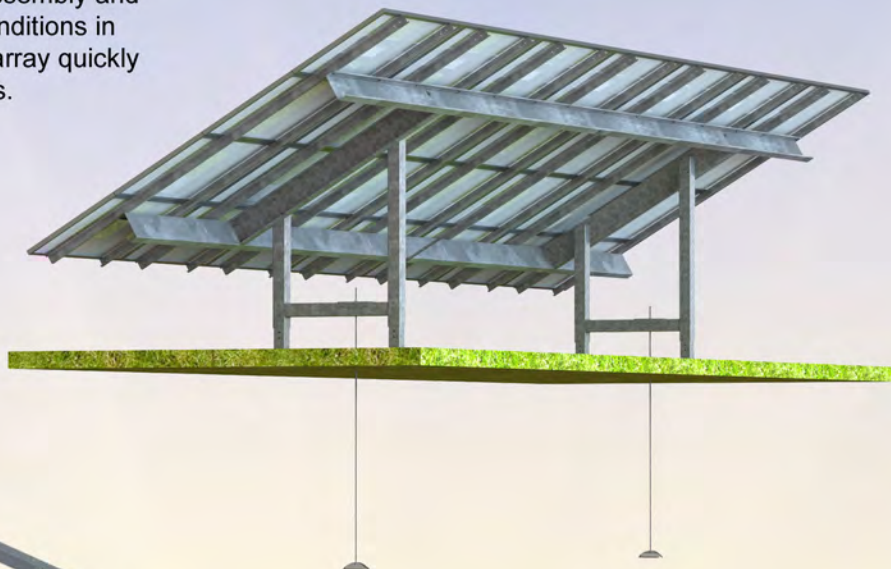

Driven Beam

Fast, Easy Installation

Modular panel construction provides fast, easy off-site assembly. No longer do you have to wrestle with panel assembly in adverse conditions. And, pre-assembly and testing of panel modules under controlled conditions in a local warehouse lets you set up the PV array quickly and efficiently especially in the winter months.

**Off-site assembly,
module mounting
and stringing**

**Single Point soil anchor penetration
saves time, money and labor.**

Daetwyler's **Modu-Rack™**
Modular PV System gives you
the control you need at a cost
that is attractive to you and
your client.
