## Advantages of the Daetwyler Clean Energy Solar Panel Mounting System

**Daetwyler Clean Energy (DCE)** is known throughout the international renewable energy market as the premier solar mounting hardware manufacturer. With DCE's experienced engineering and global fabrication facilities, we provide economical solar mounting hardware direct to installers and project developers. Some of the advantages of our Solar Mounting Solutions include:

Easy Layout and Assembly.

Fast, easy panel installation.

Secure tilting design allows for ease in installation, wiring and roof maintenance.

Wiring and conduit can be run underneath the system thereby lowering costs of these materials.

# Daetwyler Clean Energy

## Advantages of the Daetwyler Clean Energy Solar Panel Mounting System

Better system performance due to being higher off the roof deck.

Less ballast required in comparison to other systems.  
(Typical 4.6-5 lbs./sq. ft. at 90 mph wind speeds)  
Reduces cost, man hours and application time for most roofs.

Minimal Hardware required. This is the only bolt in the entire system. Every other component has built-in set screws.
